

# We take it We make it

Visy's recycling and remanufacturing operations divert large quantities of material away from landfill. We process recyclable materials (**'We take it'**) and re-make them back into packaging (**'We make it'**).

Visy owns the largest network of Material Recovery Facilities (MRFs) in Australia

We process recyclables from over 3.8 million households and more than 8,700 commercial and industrial customers

In FY23, we sorted and processed more than 1.8 million tonnes of recyclables
