

Better plastic for a better world

Visy rPlastics

Better bottles, better jars

Visy is a global leader in recycled PET (rPET) and recycled HDPE (rHDPE) production and packaging.

From 100% rPET bottles to Australia's first 50% rHDPE milk bottle, we are committed to increasing the amount of recycled plastic in packaging.

We have invested over \$65 million across Australia to increase the amount of plastic we can recover and remanufacture—helping prevent it from being landfilled or exported.

2b

Containers and preforms
made in Australia and
New Zealand annually

Visy rPlastics is supported by a broad range of packaging and supply chain experts. With 150+ operations across Australasia, Visy is a global leader in packaging and resource recovery, and has been a pioneer in sustainability for over 75 years. We can provide you with expertise and insights to help your business grow. We make around 2 billion containers and preforms in Australia and New Zealand each year.

Keeping it local

Visy is proudly Australian owned. We have 9 plastic manufacturing plants located in major cities across Australia and New Zealand.

We sort and recycle plastics at our dedicated facilities in Smithfield, New South Wales and Somerton, Victoria. This means we can make plastic products locally, from materials that are recycled locally.

Our large footprint and unique closed loop system allows us to respond promptly to changing market conditions. This provides you with more flexibility, greater reliability and faster speed-to-market.

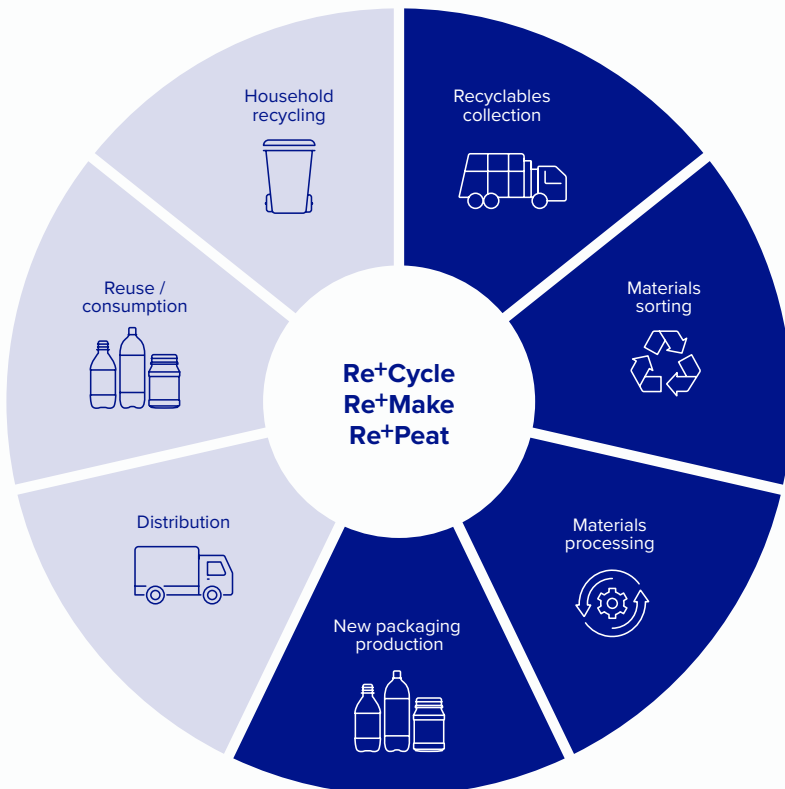

- ✓ Shorter supply chains
- ✓ Local recycling and circular economy
- ✓ Supporting local green collar re-manufacturing jobs
- ✓ Flexibility and responsiveness

Helping your brand be part of a better world

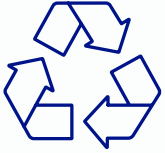

At Visy, we take a sustainable approach to everything we do. We are an integral partner in helping you meet your own sustainability targets and ensuring you can make a significant contribution to creating a better world.

Our rPlastic products are made from recycled material and can be recycled in your kerbside bin after use, to be remade into new plastic bottles and jars. These packaging features can play a crucial role in marketing the sustainability benefits of your product lines.

Choosing rPlastics packaging that's been re-made from recycled plastic can help create:

- ✓ Less pollution
- ✓ Less reliance on natural resources
- ✓ Less landfill
- ✓ Less energy
- ✓ Less carbon emissions

The future of plastic is recycled

An independent lifecycle analysis shows Visy's recycled plastics offer significant greenhouse gas emissions and water savings compared to virgin plastics.

For example, Visy's 100% recycled PET resin cuts greenhouse gas emissions by 65% and water use by 64% compared to 100% virgin PET resin.¹

For more information on the lifecycle analysis, please request a copy from our Visy plastics team.

It's better plastic, **for a better world.**

Add the Re+ mark of sustainability

It represents that the product is made by Visy in Australia and New Zealand, is made using some recycled content, and is recyclable in Australian and New Zealand kerbside bins.

marketing@visy.com.au

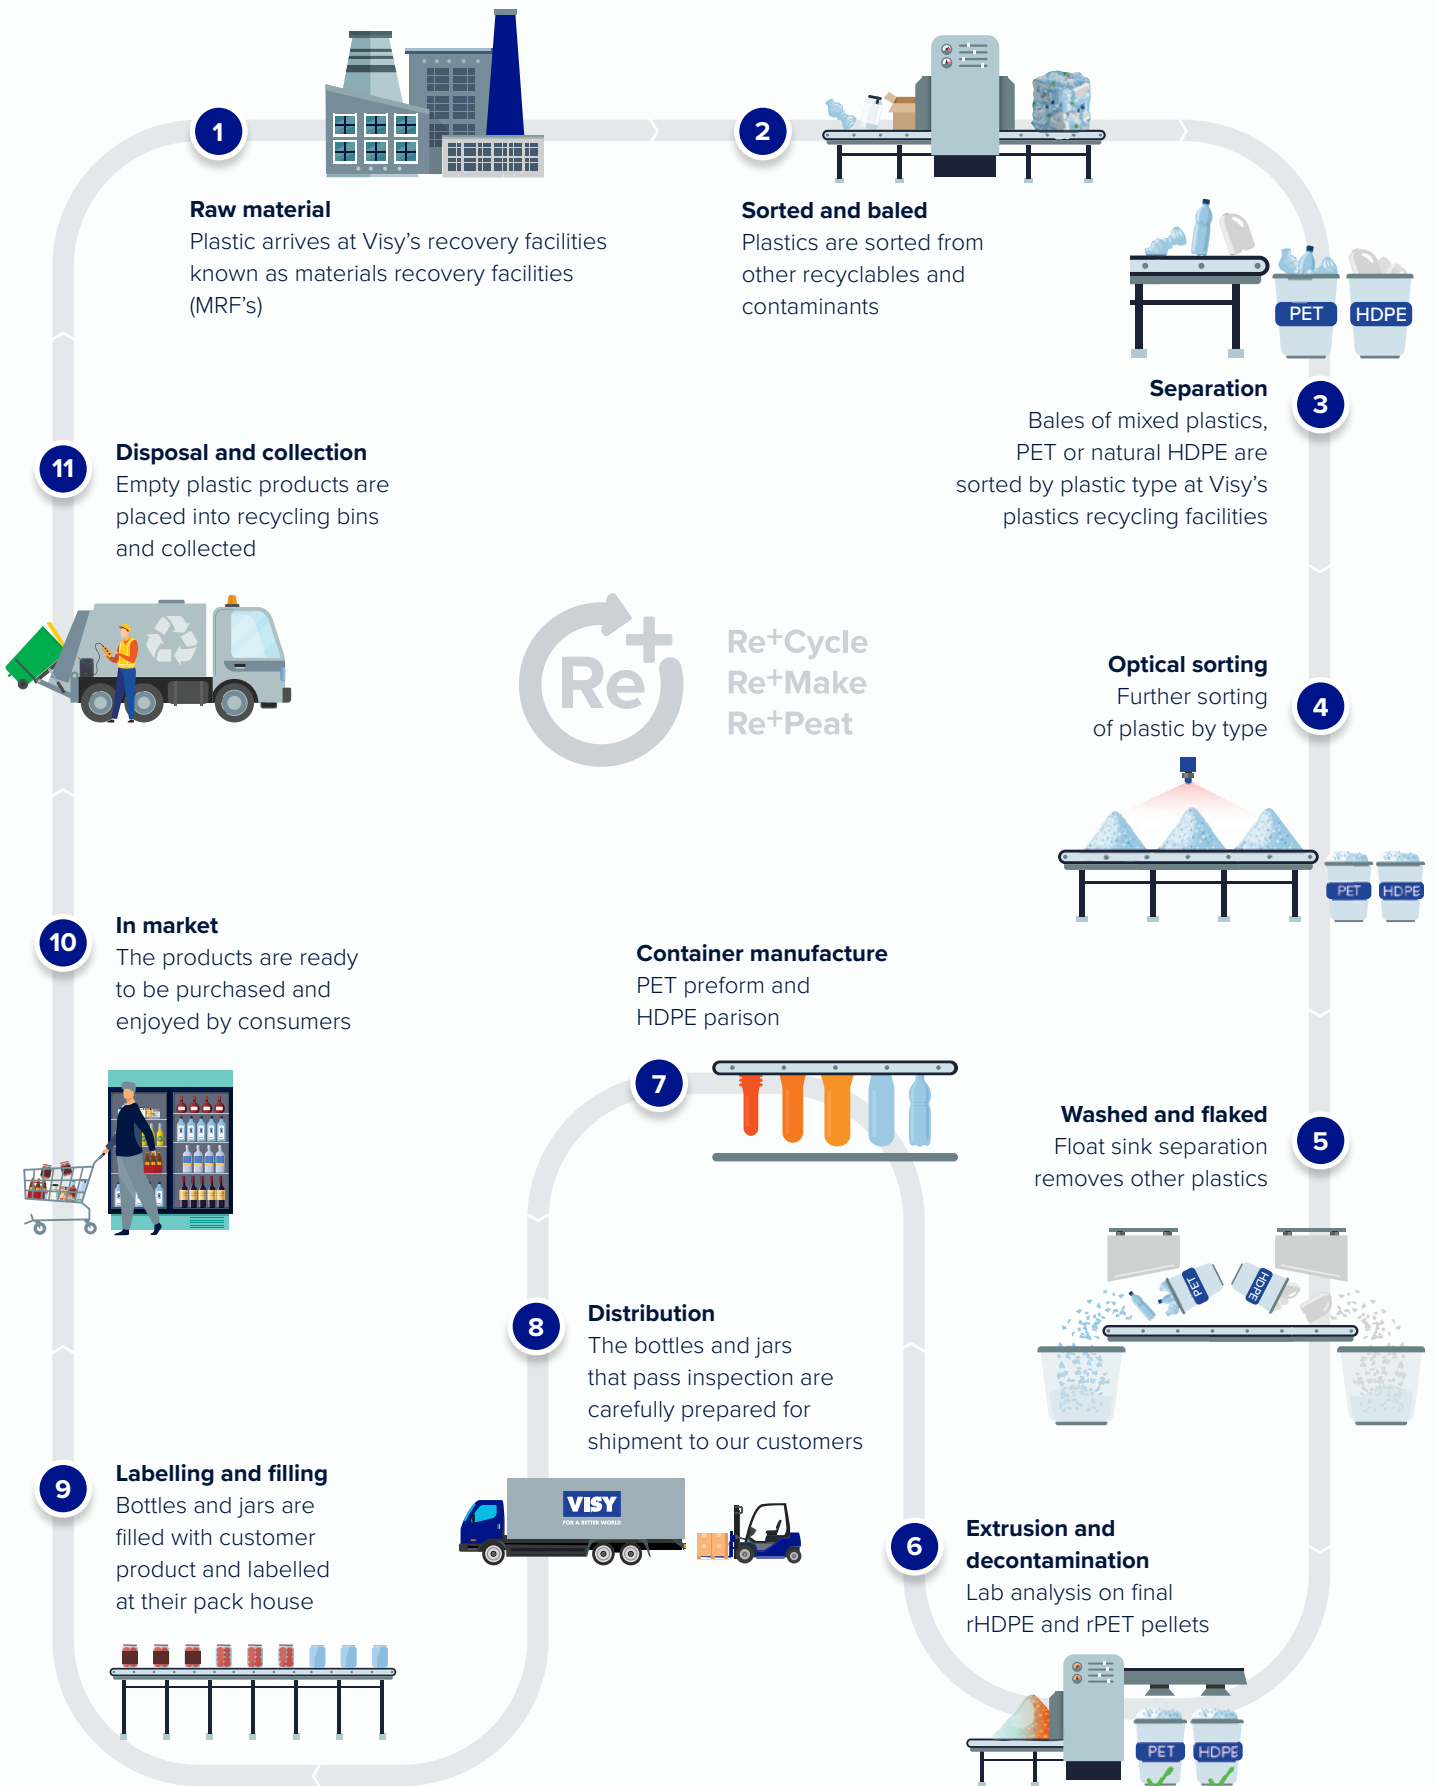

1. Based on a model developed by an independent lifecycle assessment practitioner comparing data from a lifecycle analysis of Visy recycled resin (which used Visy FY23 production and operational data) against the Carbon Minds inventory database for virgin resin (published in October 2022).

How rPlastics are made

Have you ever thought about how the plastic that is used to package your product is made in a closed loop system?

Learn more about our plastics packaging: www.visy.com

Visy bottles and jars

No matter what beverage or food you are packaging, we can offer you high-quality, recyclable options tailored to your needs.

Our large range of premium plastic packaging includes:

Beverage

Non-alcohol: water, CSD, juice, sports drinks, cordials.

Alcohol: beer, wine, spirits.

Dairy

Milk, cream, yoghurt, ice cream.

Food

Sauces, dressings, toppings, jams and spreads, fruits, confectionary, snacking.

Industrial

Chemical, agricultural and petrochemical cubes and jerry cans, dangerous goods containers, tailored items.

Pharmaceutical

Jars, vials and bottles.

Non-food and household

Soaps, detergents, personal care, cosmetics products, pet food.

Benefits of rPlastics

Hygienic

rPlastics packaging helps prevent contamination. It can also extend the shelf life of food, beverages, dairy and alcohol products.

Lightweight

Lighter than other packaging options, using less material, and decreasing weight for transportation.

Recyclable

rPlastics packaging can be recycled. Food-grade recycled PET and recycled HDPE can be included back into plastic manufactured by Visy.

Durable

rPlastics is shatter resistant and does not break when you drop it, unlike some other packaging options.

Secure

rPlastics packaging can be securely sealed shut, including through use of child proof and tamper proof caps.

Versatile

rPlastics can be blow moulded and injected moulded making them flexible across a diverse range of products and industries.

Helping your brand stand out

Our innovation platforms give you access to global trends and the latest technology.

From stock designs to unique bespoke creations, we partner with you to create iconic packaging designed to enhance your brands product and engage consumers.

Injection moulding

We make high quality injection moulded plastics for general food, refrigerated food and non food products.

Extrusion

We provide extensive, scalable and efficient extrusion blow moulding services and machinery lines.

Single stage blow moulding

We make PET single stage blow-moulding for beverages, condiments and automotive liquids.

In-mould labelling

We use in-mould labelling for juice, milk, sauces, fruit, water, dairy, personal care products and infant formula.

Our expertise extends beyond rPlastics

Our expertise across multiple packaging types, supply chains and markets ensures we can help you deliver cutting edge packaging and supply chain solutions.

So whether you are just starting out, or you are a well established brand, we can help tailor solutions that help you today and into the future.

Automation

Automation solutions for improved safety, efficiencies and cost outcomes for your supply chain.

Packaging and label adhesives

Specialised adhesive solutions and custom advice for all your packaging and labelling.

Technology systems

Product quality inspection, identification and labelling technologies, offering greater supply chain efficiencies and waste reduction.

Logistics

Our next generation logistics company offers a full range of local and global logistics services to streamline supply chain processes and provide confidence your product will arrive safely and on time.

Protective packaging

A full range of complementary packaging solutions to protect your products during transportation, including customised premium-print options and a specially designed range for e-commerce.

Cardboard boxes

Regular, standard or custom 100% recycled and Kraft cardboard boxes to transport your rPlastic containers.

Retail solutions and merchandising

Help your brand stand out in store with locally-produced, premium print, bespoke displays and interactive options designed to attract and engage your customers.

Visy Connect

Product authenticity, temperature monitoring, consumer engagement, track and trace and re-ordering solutions.

More recycling, less landfill

Visy uses recyclable materials
and re-makes them back into
sustainable packaging

Visy owns the largest network of Material
Recovery Facilities (MRFs) in Australia

Visy process recyclables from over **3.8
million** households and more than **8,700**
commercial and industrial customers

In FY2023, we sorted and processed more
than **1.8 million tonnes** of recyclables
